

India's Agricultural Crop Production Analysis.

TEAM ID	SWTID-2026-8827
PROJECT TITLE	India's Agricultural Crop Production Analysis.
MAX MARKS	3 MARKS

6.6 – Creativity (Font and Style)

The India's Agricultural Crop Production Analysis dashboard is designed using a simple, modern, and professional font style to improve readability and visual appeal. The main title is created using Candara Bold with a font size of 14 , making it attractive and easy to identify. Section headings use 12 pt Bold, while the body text is written in 12 pt Candara with 1.5 line spacing and Justify alignment for a clean and organized appearance.

The dashboard follows a nature-inspired color theme to represent the agricultural domain effectively. Different shades of green are used for crop growth and production, blue for irrigation and water resources, yellow and orange for harvest and seasonal crops, and red for highlighting low production or critical values. Charts, maps, and KPI cards are designed with consistent colors and formatting, making the dashboard visually engaging and easy to understand.

The overall layout maintains proper spacing, alignment, and consistency across all dashboard elements. Interactive filters, labels, and legends use a 10–12 pt font size to ensure clarity without overcrowding the screen. The balanced combination of fonts, colors, icons, and visual elements creates a user-friendly dashboard that enhances data analysis and helps farmers, researchers, and policymakers make informed decisions efficiently.
